PROJECTS

Personal Portfolio - <https://www.roimalka.com>

- Built a website for my projects and contact.
- Utilized media queries and Framer Motion to make the site fully responsive with animations.
- Used: React, Sass, Framer Motion. (Always updating)

Weather App - <https://roi-malka-weather-app.netlify.app>

- A weather app that displays a city's current and next week weather on user search.
- Gave the users the ability to save a city to favourites using Redux.
- Has a Celsius/Fahrenheit toggle button.
- Used: React, Redux, Accuweather API, Sass, Axios.

Wildfires Tracker - <https://wildfires-tracker-roimalka.netlify.app>

- A project showing real-time wildfires happening around the globe.
- Utilized both NASA and Google Maps API's.

Tesla Clone - <https://tesla-clone-roimalka.netlify.app>

- Copied Tesla's home page from scratch.
- Used: React and Styled Components to experience different code writing and styling.

Personal Fitness Trainer - Work in progress

- Built a website for a fake gym studio.
- Tried having it look modern and close to other real gym studios designs to make it appealing.
- Used: React, Sass, Framer Motion.

WORK EXPERIENCE

IT Support Specialist

Maccabi Health care

Services May 2020 - Dec 2020

Gave daily technical support to over 5000+ end users and solved various technical problems, while monitoring over new applications and programs that were constantly being added.

- Shortened and made the IT Support calls more effective each day by correcting wrong solutions and adding new ones in the Support solutions website.
- Made the calls faster and more efficient by 15% by Giving the idea to add a feature to the IT Support calls app.

Graphic Design Team Leader

Israel Defence Forces

Nov 2017 - July 2019

- Served in the design team of the Mofet unit, helped creating multiple designs for the unit's personal interest, one of them being the current logo of the unit.
- Took part in producing a vacation tracking site for career soldiers.

Information Technology Support Specialist

Israel Defence Forces

March 2017 – Oct 2017

- Provided technical support to a large organization, in addition to providing higher level support to the technical support teams in different bases that served under the HQ.
- Experienced with tools such as: AD, SCCM, Bosanova, Microsoft Exchange, Windows.

SKILLS

HTML, CSS, JavaScript, React, Redux(State Management), using APIs, Sass, Git, GitHub, UI frameworks like Material UI and Ant Design, Netlify, Firebase.
